**ON OUR
MINI MILL-THREAD
Type MTI**

Promotional code: PDM26-08

Product of the Month for August: MTI Mini Mill-Thread for threading deep parts

MTI mini thread milling cutters with partial profile enable reliable thread cutting in deep workpieces and are suitable for various pitches as well as internal and external threads

High-performance carbide grades:

MT11 – Ultra-fine submicron grade with a triple blue PVD coating for maximum wear resistance and long tool life

MT8 – Fine-grain carbide with a multi-layer aluminum-titanium nitride coating (ISO K10–K20). Its high temperature resistance enables high cutting speeds and ensures excellent tool life. Universally applicable for standard and fine threads.

Features:

- Suitable for threads starting at ISO M1.6 x 0.25 and 0–80 UNF
- Supports 60° and 55° thread profiles
- Multi-cutting edge design (3 cutting edges) for efficient machining
- Optimized for deep workpieces and demanding applications
- High process reliability and excellent surface quality
