**SINTERED THREAD
TURNING INSERTS**

Promotional code: PDM26-07

Product of the Month for July: Sintered Type K Threading Inserts

Maximum performance in threading – the sintered Type K threading inserts deliver impressive results with an effective chipbreaker, high wear resistance, and optimal cutting edge protection.

Designed for a wide range of typical thread profiles: Partial profile 55° and 60°, ISO metric, UN Unified, Whitworth – 55°, BSPT, NPT

Features:

- Effective chip control for reliable processes
- Optimal cutting edge protection for longer tool life
- High wear resistance even under demanding conditions
- Compatible with standard tool holders

Available carbide grades:

KMR – Versatile grade for wide range of materials as steels, stainless steel, super alloys and non-ferrous, best for medium to high cutting conditions. A multi-layer coated grade with high wear resistance.

KBL – Latest development of carbide grade with our innovative coating ensures a long and stable tool life machining steels, stainless steels, cast iron and hardened materials up to 45 HRC. A combination of high toughness and high heat and wear resistance. For medium to high cutting conditions.
