Advantages of Mill-Thread Solid Carbide

- Spiral flutes allow smooth cutting action.
- 2.2 mm and up cutting diameter.
- Threads up to shoulder in blind hole.
- Longer tool life due to special multi-layer coating.
- Same tool can be used for a variety of materials.
- Excellent surface finish.
- Low cutting pressure allows thin wall machining.
- Same tool used for R.H and L.H. threads.

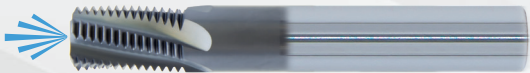

MT Type

P N

For normal Steel and non-Metallic Materials.

MTB Type

P M K

Used for blind holes due to the internal coolant on the front.

MTZ Type

P M K

For through holes to remove chips due to internal coolant on the flutes.
