

Nordencut Neat N 21

High Performance Chlorine Free Neat Cutting Oil

Nordencut Neat N 21 is a medium viscosity, neat cutting oil. Nordencut Neat N 21 has a robust chlorine free lubricity package that gives excellent machining performance in general to moderately severe operations.

Nordencut Neat N 21 is amber in colour and has excellent cooling properties along with a high dielectric strength. Because of its composition, it is non-staining for ferrous and nonferrous surfaces. It gives good wetting and penetration of cutting surfaces.

Machining operations

Deep hole drilling

Boring

Arduous grinding operations

Honing operations

Material suitability

Titanium

Ferrous alloys

Aluminium and Magnesium alloys

Typical data

Appearance	Amber Fluid
Odour	Mild
Density @ 15°C	0.90
Kinematic Viscosity @ 40°C	21 cSt
Flash Point (PMCC) °C	>160°C
